

# SCATTERED TREASURES

Scattered Treasures - A Landmark in the Entertainment Industry

## Director's Message

Greetings world,

Scattered Treasures is the first celebrity driven, Blockchain centered, social enterprise on the planet. Our mass appeal and global vision make us one of the most intriguing business models of the 21st century. Our concept transcends cultures, genders, and all ages. Our international reach leaves no stone unturned.

The market is primed for an innovative strategy to take center stage. The professionals at Scattered Treasures have prepared the company to be that revolutionary strategy. The platform has the bandwidth to interface with billions of fans in a real time atmosphere. Customer acquisition costs are negligible, and the ROIs are immense. This complimentary suite of game-changing products and services is a rising star in the automated entertainment industry.

Never have I been so enthusiastic about an opportunity.

Cheers,

Mari MusaBande, CEO | Founder

## Background Story

My name is Mari, and I am the CEO and Founder of Scattered Treasures | YO code. I'd like to take this time to tell you about myself and how we began. My background is in aerospace and electronic systems technology. I'm also a US Air Force veteran with interests in cutting edge technology, professional sports, music, and philanthropy.

Scattered Treasures was an idea that presented itself after a 2015 live listening event. The party featured a Grammy Award winning entertainer. Immediately following the event the artist gave away ten personal items via lottery. All I had to do to participate was donate twenty dollars to her foundation.

I was fortunate enough to be one of the winners and I chose a framed photo, which she was kind enough to autograph. After leaving the event I was super-excited about my memorabilia, but before I got within five feet of my vehicle a small a group of women accosted me. Each one screaming at the top of their lungs.

It took me a moment to realize they were bidding on the autographed photo I'd just won. I was astonished and delighted at the same time, as I sold the piece to the highest bidder. I walked into the party with a hundred dollars in my pocket and left with \$10,000.

I discovered that fans are crazy about real time celebrity experiences, which birthed the concept. Staying connected to our favorite entertainers has become one of the nation's favorite pastimes. More so, this connection is an amazing means of creating financial synergy for global philanthropy.

## Executive Summary

### Scattered Treasures— a Charity Focused | Celebrity Driven | Social Enterprise

The company features a real time, global experience app. This platform is an innovative mass-market business model that will interface with celebrities and billions of fans via a proprietary social media app stacking process. Scattered Treasures was created to generate financial synergy for philanthropic endeavors. Users all over the world can pay-it-forward and entertain themselves at the same time by trading, purchasing or auctioning exclusive items and unique experiences from their favorite stars and corporations via our patent-pending Sync to Link technology™.

Scattered Treasures provides celebs with a simplistic and fun way to monetize their fame while generating philanthropic synergy. It will target the U.S. market as well as international audiences, Fortune 500s, celebrities and influencers alike.

Scattered Treasure is poised to be the world's first celebrity driven concept integrated with Blockchain technology. It's built to bring billions of fans and entertainers together on one virtual platform. To facilitate its customers and global reach Scattered Treasure is introducing its underlying value token—ScattCoin.

ScattCoin is based on the 'Ethereum' concept powered with Blockchain technology. As a fully decentralized platform, Scattered Treasures allows instant payments with its ScattCoin token, which will be used as an instant payment. This will increase the security of its user's digital payment credentials, protecting the interoperability of the ecosystem while preserving and sustaining its community.

## Abstract

Scattered Treasures is designed to generate economic synergy for philanthropic endeavors. Users all over the world can pay-it-forward and entertain themselves at the same time by trading, purchasing or auctioning exclusive items and unique experiences from their favorite stars via our patent-pending Sync to Link technology™.

The platform brings billions of fans and celebs together on one virtual platform. As a fully decentralized platform, Scattered Treasures will allow instant payments with its ScattCoin token. This will increase the security of its user's digital payment credentials, protecting the operability of the ecosystem while preserving and sustaining its community. YO code technology is empowered by NFT based on BEP -721.

### Vision:

- ✓ Assisting professionals, athletes, entertainers, & brands monetize their IP in Web3 with NFTs.
- ✓ Empower users, transformation broadcasting habits and connecting fans through the Metaverse
